

OBV-02 BROADCAST-CAMERA TRUCK

FABER
AUDIOVISUALS

The Faber-OBV-02 Broadcast registration truck (build in 2007) combines big performances with a compact size. Due to its compact size the OBV-02 can operate on almost every location and is fully operational in one hour. Its possible to operate up to 5 broadcast cameras.

The truck has 3 VTR-work spaces which can be installed with any recording and playback equipment. Furthermore there is the possibility for a two channel digital hard disk player/recorder, different (digi) betacam or dv-cam machines or inscriber title generator.

Standard the OBV-02 has a 12 channel video mixer, a digital 24 channel audio mixer and last but not least air-conditioning and heater.
